

Judah Katrina Rivera

EXECUTIVE ASSISTANT & PROJECT MANAGER

PROFILE

Most CEOs are unknowingly acting as their own Executive Assistant, and it is costing them time and focus. I fix that. I am a proactive, AI-savvy EA with 4+ years supporting founders and business owners across the US. I take full ownership of inboxes, calendars, team coordination, and SOPs so you can grow your business instead of running it. I do not wait to be told. I anticipate, act, and build systems that keep things moving without you, while handling sensitive executive communications with strict confidentiality at all times.

EXPERIENCE

Executive Assistant & General VA | Start-Up Digital

Feb 2022 - Present

Right hand to the CEO of a digital agency, owning the day-to-day operations she should not have to think about. I open Missive each morning to triage her inbox, drafting and sending replies on her behalf, flagging urgent items, and archiving noise. I run team updates in Slack, coordinate task follow-ups, schedule client and team meetings, block focus time, and handle every reschedule and cancellation with full discretion. By owning these responsibilities end to end, I consistently free up 30+ hours per week for the CEO.

Executive Assistant & Client Acquisition Manager | WOW Textblast

Feb 2020 - Feb 2022

Provided direct executive support to the CEO, opening each day with a structured goals report outlining priorities and what was on his plate. Managed his inbox, monitored the sales pipeline, generated leads across multiple platforms, and produced reports that gave a clear picture of business performance. Handled the operational layer of his day with full confidentiality, and over time took on client acquisition that expanded the company's client base.

Operations Manager | IT's OK Mobile App

Jan 2021 - Jan 2023

Supported the leadership team by building SOPs, onboarding new team members, and managing daily operations. Served as the internal point of contact for cross-team coordination, ensuring smooth communication between departments. Introduced workflow automation that improved operational efficiency by 20% and freed leadership to focus on strategic growth.

Project Manager | Gogetfunded

Jan 2021 - Jan 2023

Managed grant-funded projects end to end, coordinating stakeholders and delivering initiatives to beneficiary schools on time. Tightly managed resources and timelines to ensure successful implementation against organizational objectives.

SELECTED PROJECT WORK

Freelance GoHighLevel Specialist | The Capital Vault

One-time Project

Built an end-to-end workflow automation system on GoHighLevel for a US-based business credit and funding company.
